Re: GSIS Touch Mobile App and GWAPS Kiosk

Dear Sir:

We hope this letter finds you well. The GSIS, in support of the national government's agenda to move towards digital transactions is actively promoting the use of our in-house developed GSIS Touch Mobile App. With this app, members can access their records, do tentative loan computation, apply for and monitor their loans. The app also allows tentative computations and applications for life and retirement claims. Premium and loan payments posting notifications also come standard. Essentially, the GSIS Touch Mobile App can perform all the functions of the GSIS Wireless Automated Processing System (GWAPS) Kiosk.

In this regard, we would like to solicit your assistance in the active promotion of the use of the GSIS Touch Mobile App among the GSIS members in your agency as this will promote efficient and accessible service to our stakeholders or GINHAWA as we in GSIS refer to it. We have attached to this letter an easy guide on the easy steps in downloading and using the GSIS Touch Mobile App as well as some links to GSIS produced and posted YouTube videos showing tutorials on how to use and navigate the app.

As a partner in uplifting the lives of our civil servants, may we request you to reproduce this letter and the attached flyer in conspicuous areas in your office so that your employees will be aware of this campaign to promote the use of the GSIS Touch Mobile App.

Yours in public service.

G-NEWS

for GSIS members and pensioners

Issue No. 5, 2022

Veloso - “digital transformation is vital to excellent customer experience”

GSIS PGM Wick Veloso pushes for automation during his visit to the Bicol Region last November 2022.

Government Service Insurance System (GSIS) President and General Manager (PGM) Wick Veloso announced that the pension fund will automate its key processes and systems via digital platforms to provide the ultimate customer experience for its over 2.5 million members and pensioners.

This is in line with the call of President ‘Bongbong’ Marcos Jr. for government agencies to shift to digitalization for faster, better, and more convenient service to stakeholders.

“Our customer servicing will be technology-driven so that our members and pensioners can access GSIS at their fingertips anytime, anywhere,” PGM Veloso said.

PGM Veloso said that the government’s first ever GSIS Touch mobile application will soon include facial recognition when members register or log in.

Veloso - ...from page 1

"We are working closely with the Department of Information and Communications Technology (DICT) to expand the functionalities of our GSIS Touch mobile app. Aside from the facial recognition feature, the mobile app will cover more payment portals." he announced.

Through the GSIS Touch, members may access their records and apply for a loan and monitor their loan status. They may likewise apply for life and retirement claims while pensioners may schedule their annual renewal of active status.

The pension fund chief further said that starting January next year, GSIS frontline servicing in all offices nationwide will transition to a more streamlined setup, with GSIS Touch Help Desks placed in all offices across the country.
